

Depth of Focus (Dramedy) by Kenya D. Williamson

Logline: Watching her father leave and her mother's breakdown, a cynical, young photographer does everything she can to avoid falling in love, but the women in her family don't get off that easily.

Synopsis: Danni Tuttle moved to New York to become a successful photographer and to get away from her family. But, waiting tables in a low-cut, peasant dress at a greasy, Italian restaurant and playing hostess to a recently-dumped girlfriend from back home was never part of the plan. Then again, neither was liking Joe. But, that happened anyway. And as her twenty-eighth birthday quickly approaches, so does the party she never wanted and her obligatory trip back home.

Danni must tell her sister to stop nagging, keep her co-workers from scheming, ask her ex to stop flirting, visit her family without insanity, peacefully cohabit with the girl who gets everything, register for classes before the next deadline and keep herself from falling further in love – with a carefree grin and a not-too-girly toss of the hair. But, best-laid plans fly out the window when Danni finds her mother's sicker than ever.

With a little more money, Danni can go back to school. With a little luck and hard work, she won't have to wear a tacky uniform to do it. And with a lot of courage and love, she just might open her heart to the family and friends she cares about most without losing them all -- not such a bad thing once she realizes what you want isn't always what you need.
